Milan Peulic

I don't
design screens

I design
revenue loops

I help companies turn digital products into growth engines
through design and engineering.

From iGaming and Web3 to FinTech and SaaS, I understand the business
behind the interface — and design accordingly

Portfolio 2026

01

PRODUCT & APP UX

Decision-driven interfaces, dashboards, onboarding flows, and design systems for products people actually use.

02

CONVERSION WEB & LANDING

High-performance websites and landing systems built around messaging, funnels, and CTA logic — not just visuals.

03

BRAND & VISUAL IDENTITY

Cohesive identity systems that make a product feel premium and trustworthy from the first impression.

04

CREATIVE & MOTION

Illustration, animation, and ad creatives designed to test, convert, and scale across channels.

A unified approach to product strategy, design, and engineering - built in partnership, delivered with precision.

PROJECT NAME: MILKY STAR //

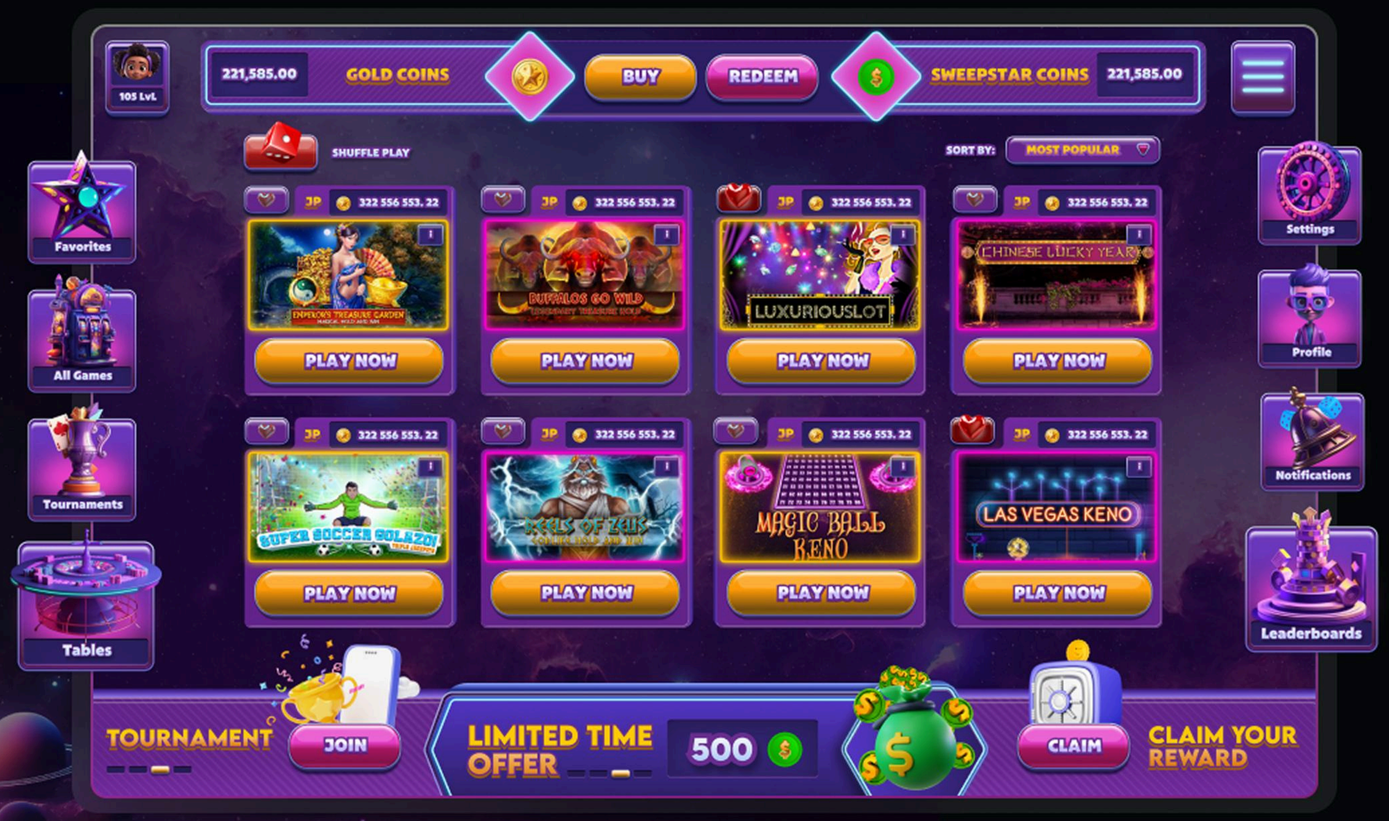

Social Casino Game Lobby

IGAMING, SOCIAL CASINO & REWARDS
/ 2026

Milky Stars is a social casino platform built around game discovery, coin-based play, sweep-style rewards, tournaments, and leaderboard-driven engagement.

The product focuses on giving users a colorful, fast, and reward-heavy casino lobby where every action feels close to play, progress, or prize discovery.

I shaped the interface around instant engagement — making coins, rewards, tournaments, games, and account actions easy to access without burying the user in complex navigation.

#SOCIAL GAMING INTERFACE

Casino Lobby Experience

A colorful card-based lobby built for quick browsing, game discovery, favorites, and instant play actions.

Gold Coins, Sweepstar Coins, buy, redeem, and reward actions were structured into a clear top-level control system.

PROJECT NAME: ROLLBLOCK //

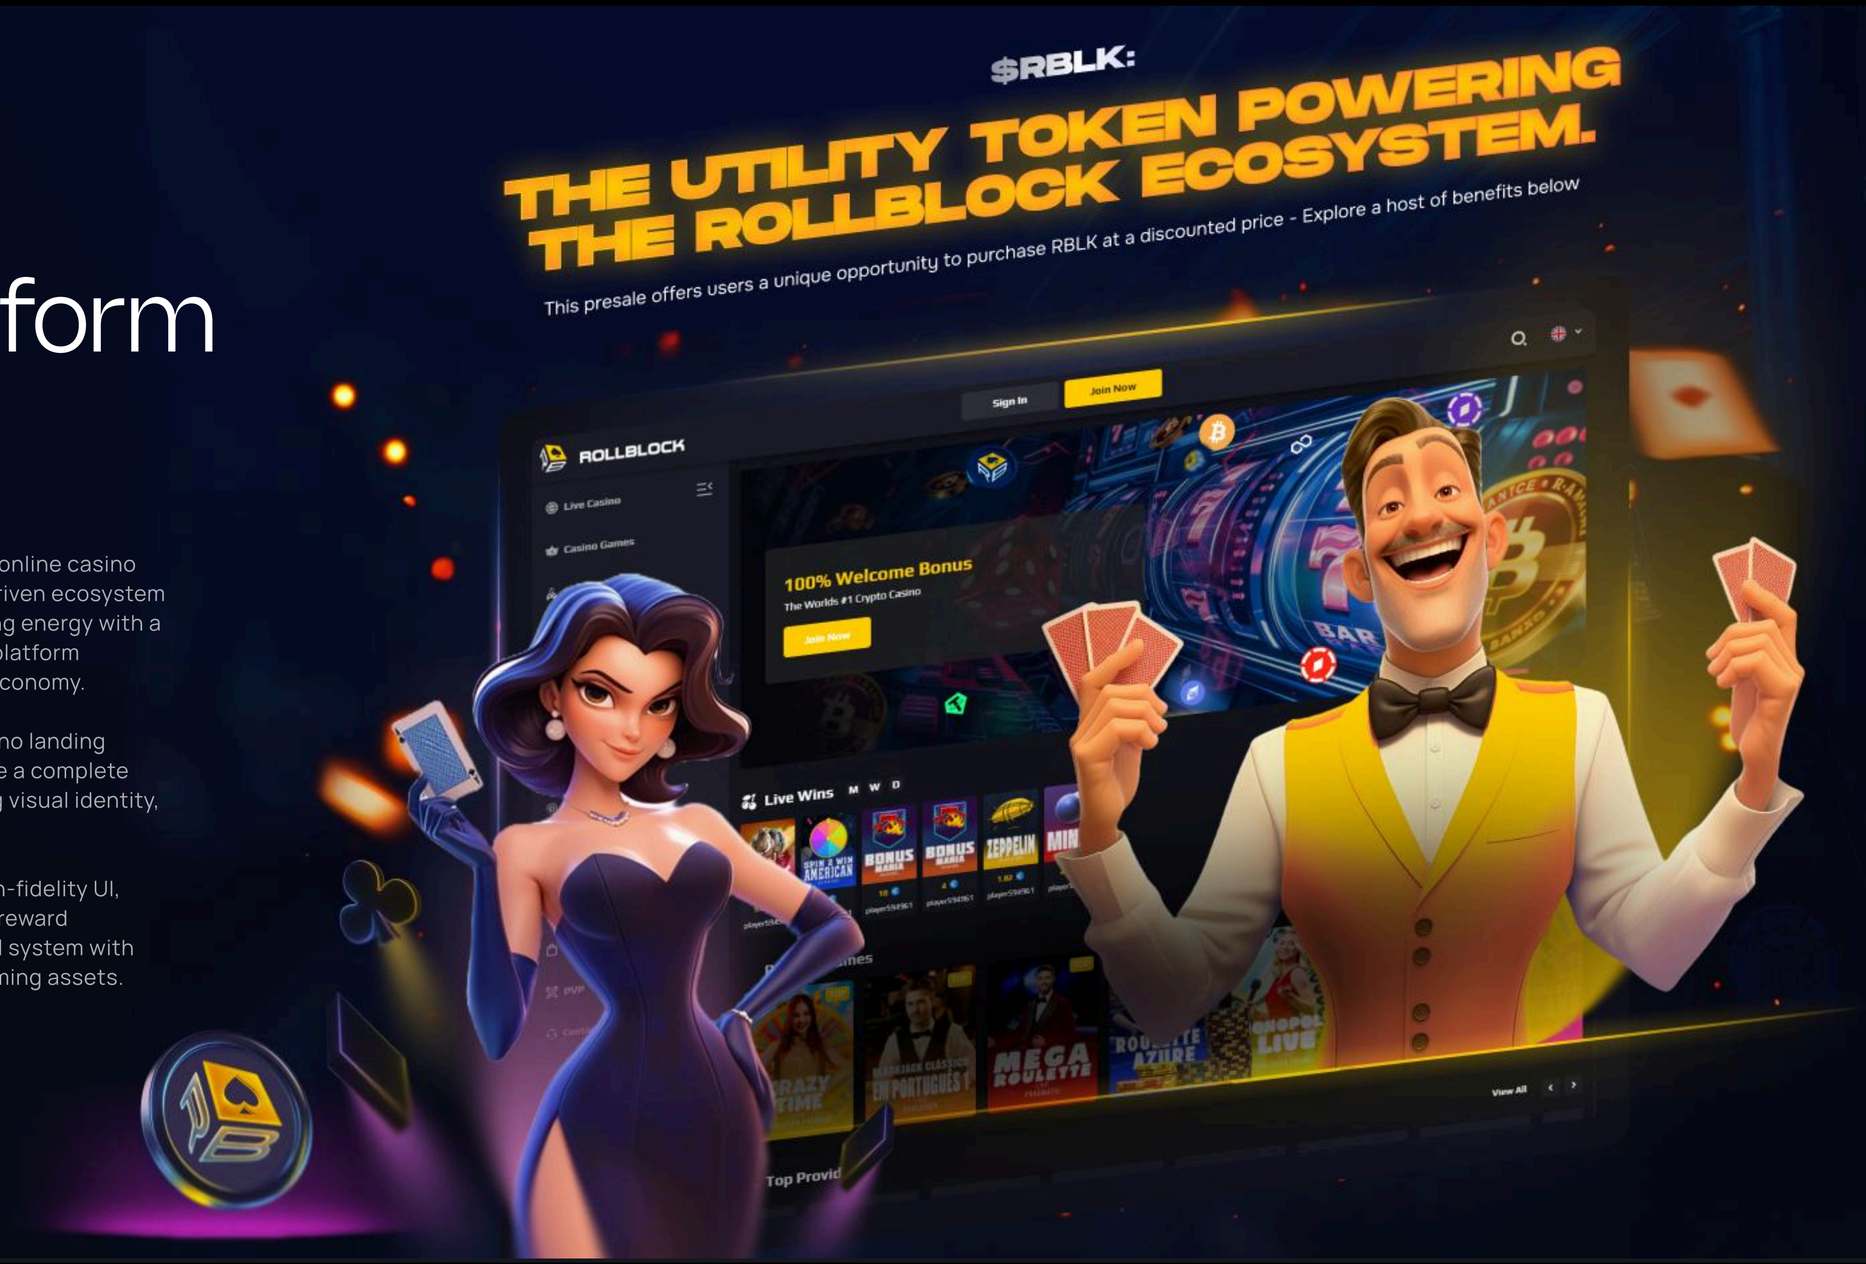

Tokenized Casino Platform

IGAMING, WEB3 & CRYPTO CASINO
/ 2026

Rollblock is a Web3 casino platform built around online casino play, crypto rewards, token utility, and presale-driven ecosystem growth. The product connects traditional iGaming energy with a tokenized model where gameplay, rewards, and platform participation support the same broader casino economy.

I positioned Rollblock as more than a crypto casino landing page — the goal was to make the product feel like a complete gaming ecosystem with clear token value, strong visual identity, and direct conversion paths.

The design included landing page structure, high-fidelity UI, casino platform visuals, token presale sections, reward messaging, benefit blocks, and a bold dark visual system with gold accents, character art, and promotional gaming assets.

Web3 Casino Ecosystem

The final direction connects casino gameplay, live win activity, token presale messaging, crypto rewards, platform benefits, and promotional CTAs into one conversion-focused experience.

The dark interface, yellow-gold accents, animated character direction, and casino-style visual language help make Rollblock feel premium, energetic, and built for Web3 gaming culture.

CASINO PLATFORM UI

A dark casino interface with game discovery, live wins, provider sections, and strong promotional hierarchy.

TOKEN PRESALE SYSTEM

$RBLK utility, discounted presale access, and token benefits were framed as part of the wider Rollblock ecosystem.

HIGH-IMPACT VISUALS

Character-driven 3D visuals, casino assets, and gold accent colors were used to make the brand feel bold and memorable.

The best player journeys feel exciting, not forced.

Smart monetization is about timing, clarity, and emotional triggers — giving players the right offer at the right moment.

PROJECT NAME: LUSTY LAGOON //

Tropical iGaming World

IGAMING, CASINO / 2025

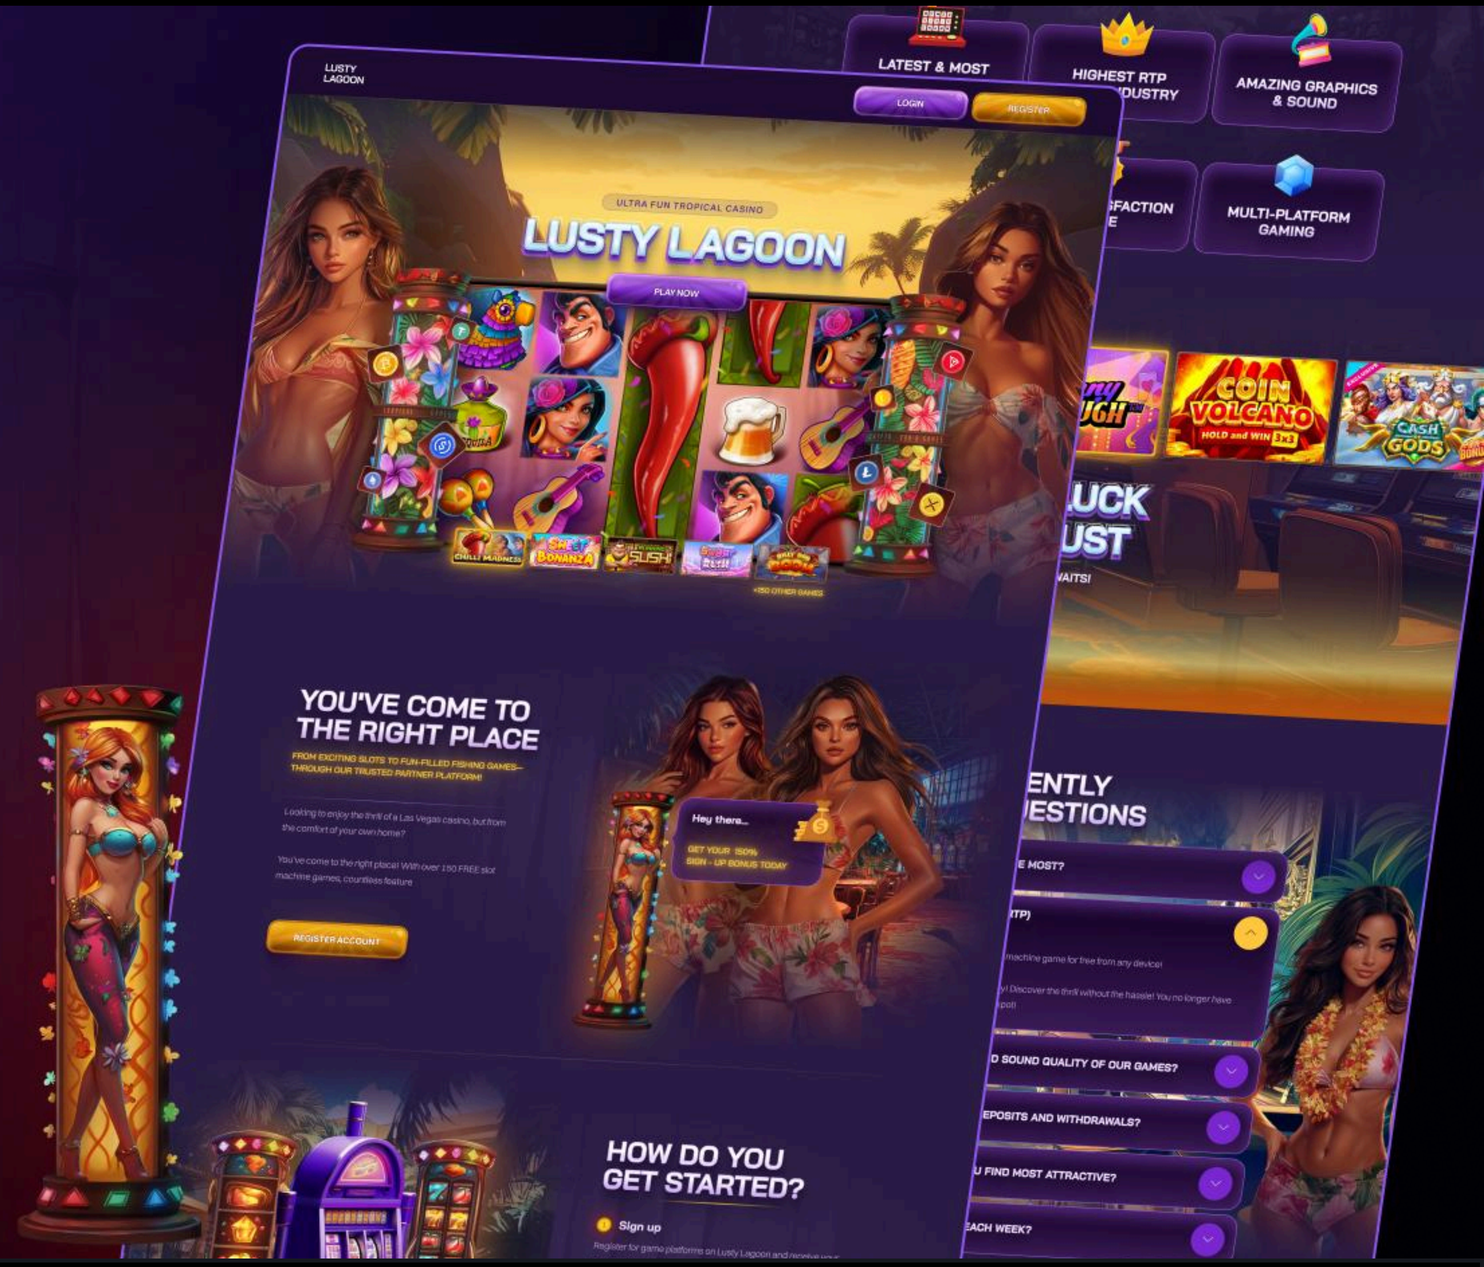

Lusty Lagoon is an iGaming product built around a tropical casino world, slot-style visuals, bold character art, and promotional gameplay offers. The product focuses on giving new players a fast, entertaining, and visually memorable entry into the casino experience.

CASINO LANDING PAGE

A high-energy iGaming page structured to introduce the brand, explain the offer, and push users toward registration.

TROPICAL GAME WORLD

The design uses island-inspired visuals, slot-machine assets, and character-driven scenes to create a memorable casino atmosphere.

Copyright © Milan Peulic 2026 - This file is confidential and is not to be shared further without approval.

Playful iGaming World

The design included landing page structure, high-fidelity UI, promotional offer sections, partner platform blocks, game preview areas, FAQ content, CTA placement, and a dark tropical visual system with neon accents and glossy casino assets.

THE RESULTS

Lusty Lagoon was positioned as an entertainment-first casino brand where the visual world needed to create instant attention before explaining the product.

The final direction connects tropical scenery, character-driven visuals, slot-machine energy, platform benefits, promotional offers, and registration CTAs into one clear landing page experience. The deep purple palette, neon highlights, glossy game cards, and tropical casino styling help make the brand feel more immersive, memorable, and built for quick player action.

Design the thrill.
Optimize the action.

From onboarding to deposits, promos, tournaments, and VIP flows —
every touchpoint should push the product closer to growth.

PROJECT NAME: CRYPTOCLYX //

Crypto Gaming Platform

Cryptoclyx is a crypto-native gaming platform built around account creation, wallet-based interaction, mini-games, player progression, and secure user flows. The product combines casino-style gameplay with Web3 mechanics, giving users a more interactive and account-driven gaming experience.

I shaped the interface to feel like a complete product ecosystem, not just a few standalone game screens. The goal was to connect onboarding, gameplay, wallet actions, verification, rankings, and profile progression into one coherent platform experience.

The design included high-fidelity UI, onboarding flows, gameplay interfaces, profile screens, wallet-related actions, verification states, ranked progression, match history, settings, and a futuristic dark visual system with neon blue/red accents.

Gamified Web3 Experience

WEB3, IGAMING & GAMIFIED UX / 2026

Cryptoclyx was designed as a connected gaming ecosystem where onboarding, gameplay, progression, and account management all support the same product story.

THE RESULTS

The final direction connects welcome offers, mini-game interaction, player levels, ranked status, wallet controls, profile management, verification flows, and settings into one unified interface.

The dark futuristic surfaces, neon blue and red accents, and dragon-inspired visual direction help make the platform feel more immersive, technical, and distinctive.

ACCOUNT & ONBOARDING FLOW

Registration, welcome package messaging, and guided entry screens were designed to make the product feel accessible from the first touchpoint.

GAMEPLAY INTERFACE SYSTEM

Coin flip, dice, and other game modules were structured through a sharp futuristic UI built for quick interaction and clear visual feedback.

PROGRESSION & VERIFICATION

Profile levels, ranked tiers, match history, wallet tools, and verification flows help the platform feel more complete and product-driven.

PROJECT NAME: PREWIN //

Premium Sports Prediction Platform

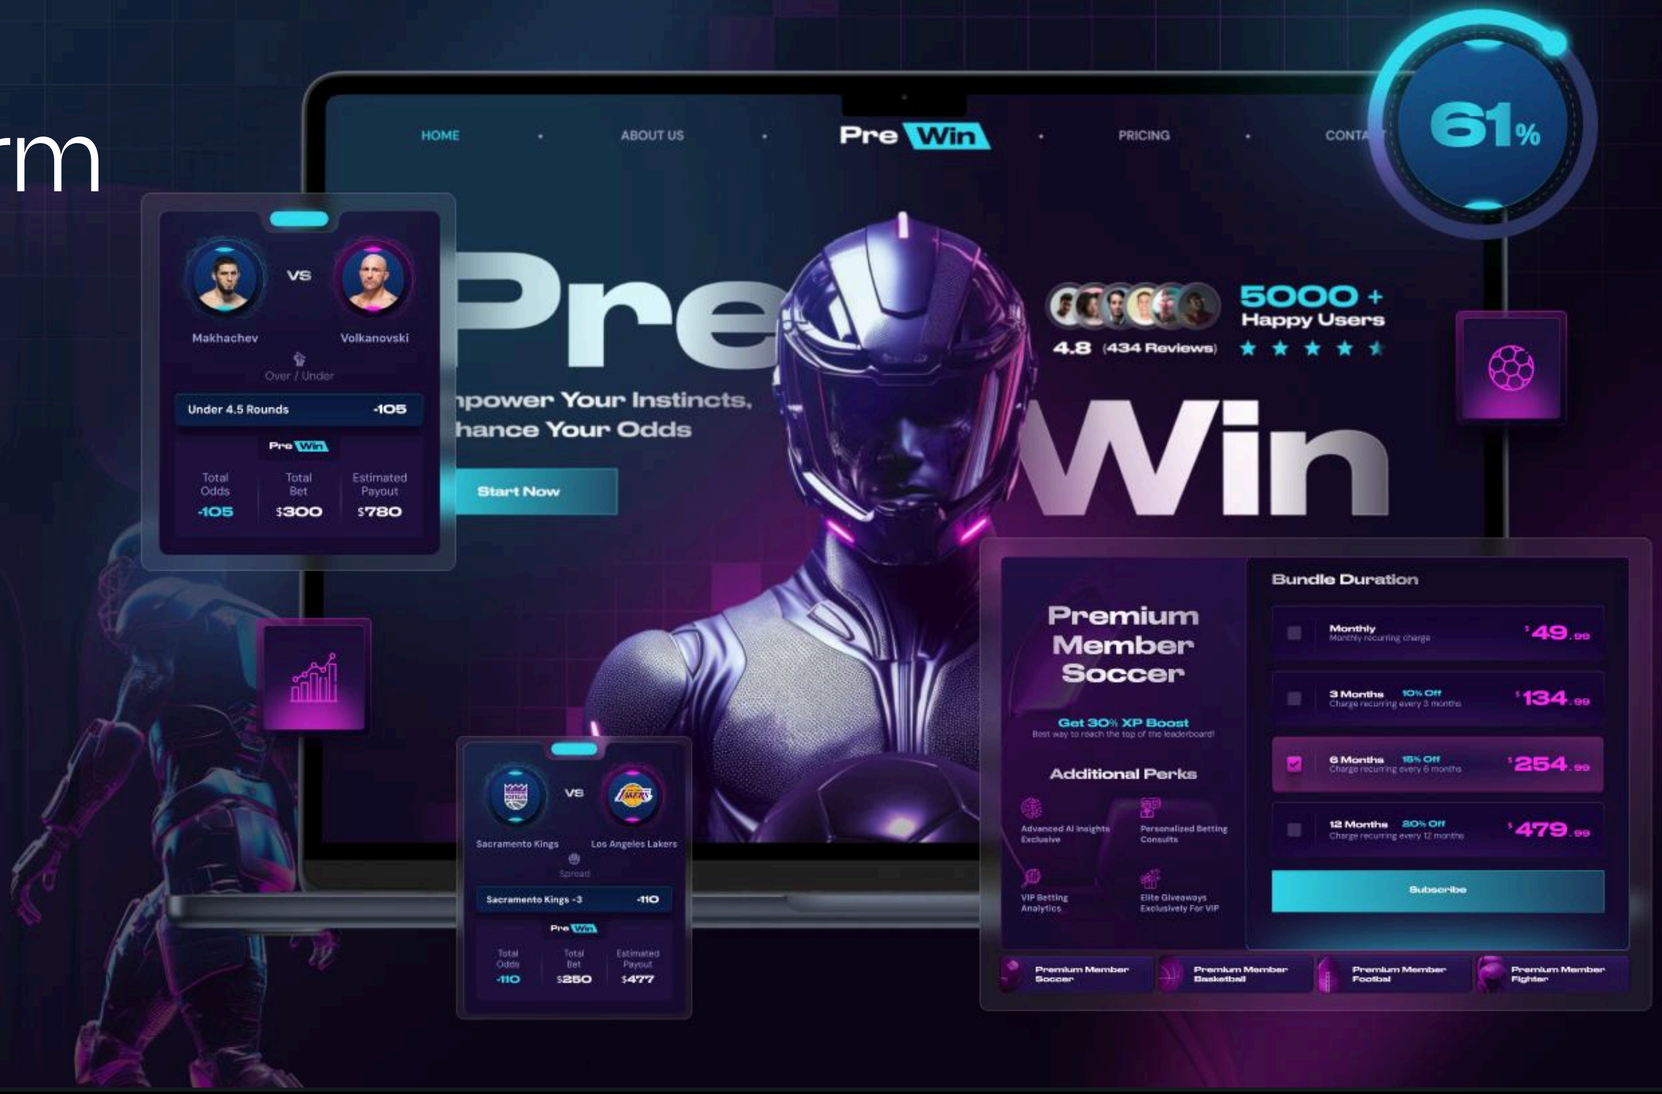

PreWin is a sports prediction platform built around match insights, betting picks, odds, premium memberships, and user confidence.

The product focuses on helping users understand betting opportunities faster through curated predictions, performance signals, and upgrade-based access.

I shaped the experience to feel more premium and trustworthy than a standard betting tips website. The goal was to make predictions, odds, subscription value, and user proof feel clear, sharp, and easy to act on.

THE RESULTS

The final direction connects match prediction cards, odds breakdowns, estimated payouts, membership tiers, premium perks, user ratings, and high-impact sports visuals into one conversion-focused product story. The dark interface, neon cyan and purple accents, and futuristic athlete imagery help make PreWin feel sharper and more premium than a basic betting tip platform.

PROJECT NAME: MODO CASINO US//

America's Hottest Social Casino!

IGAMING, SOCIAL CASINO / 2026

Modo is a mobile-first social casino platform built around casino games, arcade play, rewards, loyalty ranks, and collectible Modo Boxes. The product focuses on giving users a fast, colorful, and reward-heavy gaming experience where every screen pushes toward play, progress, or prize discovery.

MOBILE CASINO EXPERIENCE

A polished mobile gaming interface built around fast discovery, clear navigation, and high-energy casino visuals.

REWARD-DRIVEN UX

Daily bonuses, ranks, referrals, notifications, and limited-time offers were used to create stronger retention loops.

Copyright © Milan Peulic 2026 - This file is confidential and is not to be shared further without approval.

PRODUCT ECOSYSTEM

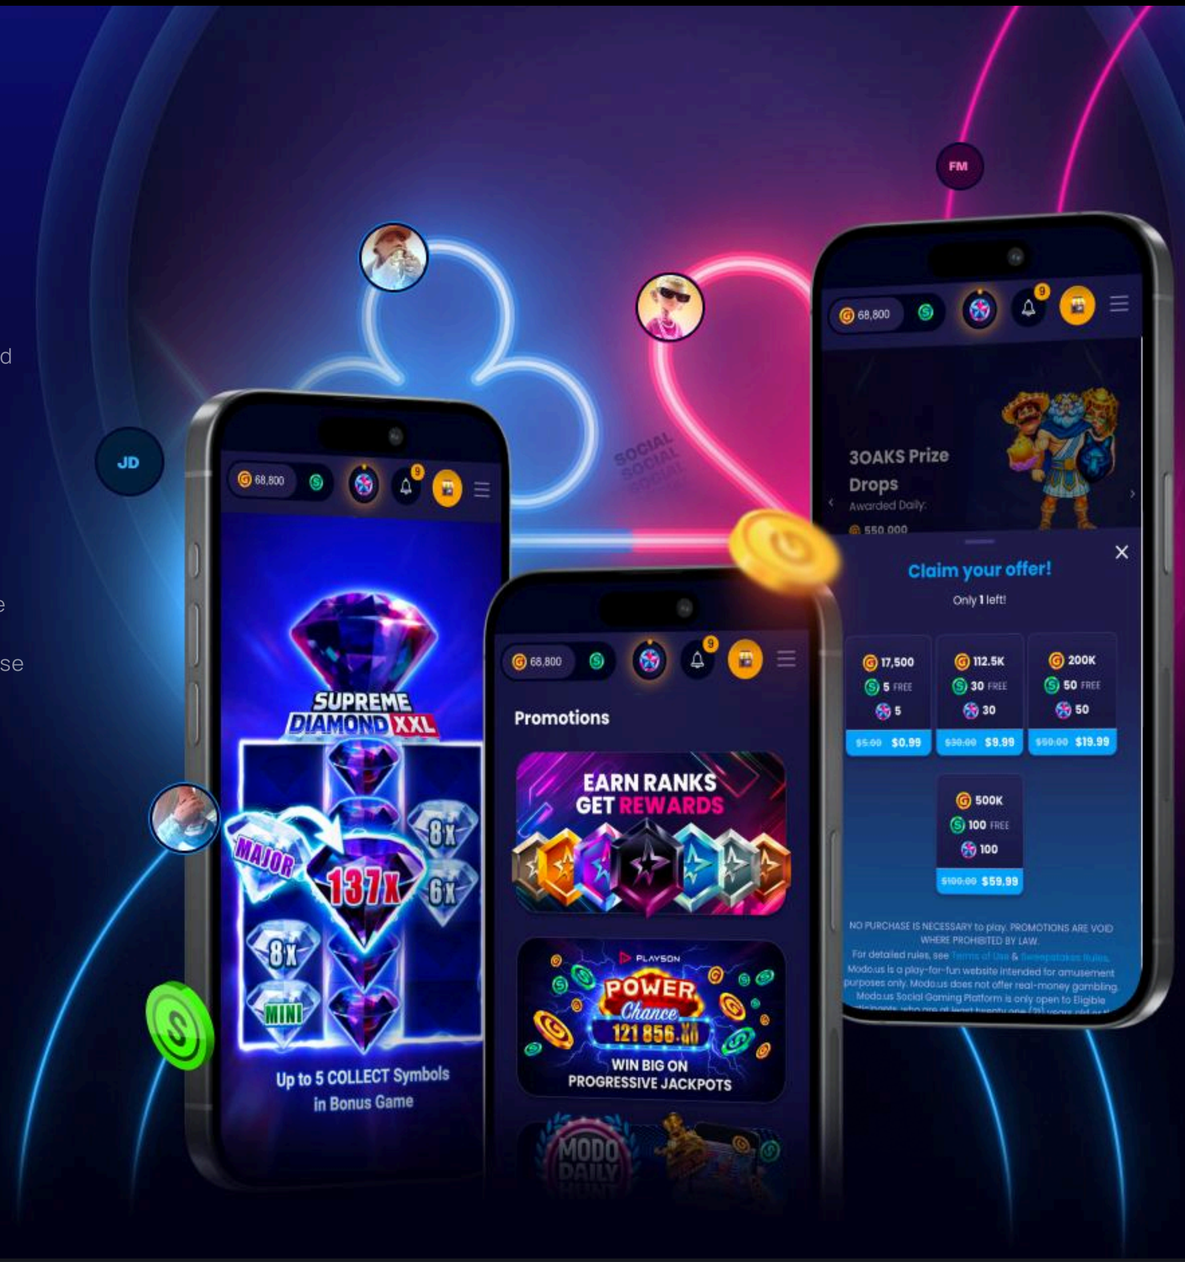

Casino, Arcade, Store, promotions, ranks, and boxes were structured as connected product areas instead of isolated screens.

OFFER ARCHITECTURE

Bundles, discounts, limited-time deals, and welcome offers were designed to create clear purchase moments throughout the app.

COLLECTIBLE MECHANICS

Modo Boxes introduce a reveal-based system where tickets, items, rarity, and redemption create a stronger sense of progression.

Beyond the Game Lobby

Modo Casino was designed as more than a standard game catalog. The product experience connects play, purchases, rewards, and collectible reveals into one continuous loop.

MEASURABLE IMPACT

The final direction connects casino games, arcade play, promotional bundles, daily bonuses, rank progression, referrals, notifications, desktop lobby views, and Modo Boxes into one unified product ecosystem.

The dark navy and purple interface, neon pink and blue accents, glossy cards, and modal-heavy offer system help make the product feel energetic, premium, and built for repeat interaction.

A unified approach to product strategy, design, and engineering - built in partnership, delivered with precision.
