Milan Peulic

I don't
design screens

I design
revenue loops

I help companies turn digital products into growth engines
through design and engineering.

From iGaming and Web3 to FinTech and SaaS, I understand the business
behind the interface — and design accordingly

Portfolio 2026

01

PRODUCT & APP UX

Decision-driven interfaces, dashboards, onboarding flows, and design systems for products people actually use.

02

CONVERSION WEB & LANDING

High-performance websites and landing systems built around messaging, funnels, and CTA logic — not just visuals.

03

BRAND & VISUAL IDENTITY

Cohesive identity systems that make a product feel premium and trustworthy from the first impression.

04

CREATIVE & MOTION

Illustration, animation, and ad creatives designed to test, convert, and scale across channels.

A unified approach to product strategy, design, and engineering - built in partnership, delivered with precision.

PROJECT NAME: NETFORK//

AI-Native Software Partner

SOFTWARE DEVELOPMENT, AI, CLOUD / OCT—DEC 2024

Netfork is a software development company focused on helping businesses build scalable digital products through global engineering talent, cloud expertise, AI-assisted delivery, cybersecurity, and product development support.

The company needed a sharper B2B presence that could communicate technical capability without feeling like another generic outsourcing website.

A unified approach to product strategy, design, and engineering - built in partnership, delivered with precision.

Copyright © Milan Peulic 2026 - This file is confidential and is not to be shared further without approval.

B2B TECH POSITIONING

A sharper website experience built to communicate Netfork's services, expertise, and delivery model with more clarity.

SERVICE-LED STRUCTURE

The page organizes cloud, AI, cybersecurity, staffing, and digital product offerings into a cleaner conversion journey.

ENTERPRISE CREDIBILITY

Case studies, partner logos, testimonials, and delivery metrics were used to build trust with larger clients.

AI-assisted delivery

The final direction connects software development, AI, cloud, cybersecurity, talent support, case studies, partner proof, and technology expertise into one cohesive B2B story.

The clean visual system, structured content hierarchy, and technical illustration style help make the company feel more mature, trustworthy, and ready for enterprise conversations.

A unified approach to product strategy, design, and engineering - built in partnership, delivered with precision.

PROJECT NAME: LYRIE //

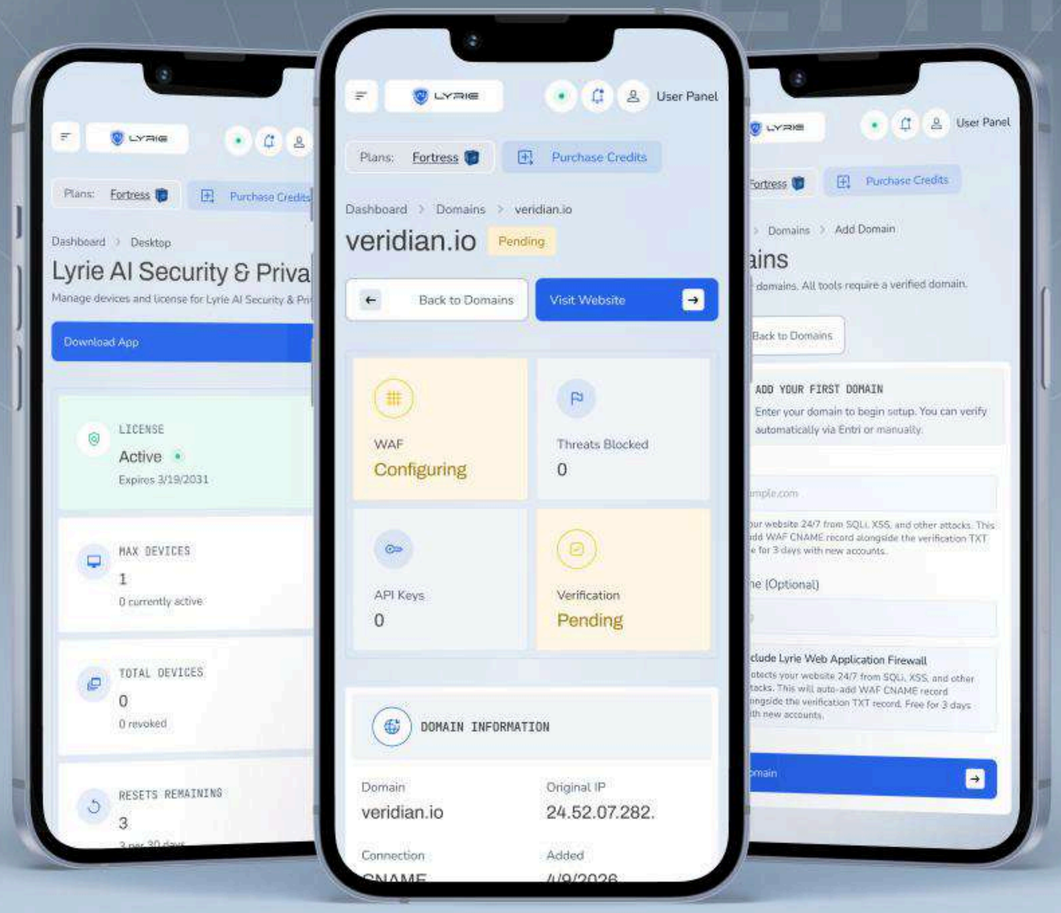

Unified Cybersecurity Platform

Lyrie is a cybersecurity platform built around web protection, endpoint defense, vulnerability scanning, automated remediation, breach monitoring, and compliance readiness.

The product focuses on helping teams replace fragmented security tools with one connected system for detecting, prioritizing, and resolving threats.

Copyright © Milan Peulic 2026 - This file is confidential and is not to be shared further without approval.

AI Security Command Center

#AI #DASHBOARD #FUNNEL

ONE SECURITY COMMAND CENTER

Lyrie brings multiple security tools into one connected experience, helping teams monitor domains, endpoints, vulnerabilities, and threats without jumping between separate dashboards.

REAL-TIME THREAT VISIBILITY

The platform helps users detect suspicious activity faster, understand risk levels clearly, and respond before small issues become serious security problems.

CLEARER SECURITY SETUP

Lyrie's setup flow helps users move from account creation to active protection faster, with clearer steps for connecting domains, endpoints, and monitoring tools.

INVESTOR READY RESULTS

Connects web protection, endpoint defense, vulnerability scanning, breach monitoring, captcha protection, compliance controls, and dashboard visibility into one cohesive product story.

Design is not decoration — it is leverage.
It shapes perception, builds trust, and turns a product into something people understand, remember, and want to use.

PROJECT NAME: FLEXPROMEALS //

Meal Prep Ordering Platform

FOODTECH, ECOMMERCE & SUBSCRIPTION UX
/ 2026

FlexPro Meals is a meal prep ecommerce platform built around ready-made meals, flexible plans, portion choices, recurring orders, and fast checkout.

The product focuses on helping users quickly find meals that fit their goals, build a plan, and order without overthinking the process.
I shaped the experience to feel fresh, practical, and conversion-focused — making meal discovery, plan selection, discounts, and checkout easier to navigate.

Copyright © Milan Peulic 2026 - This file is confidential and is not to be shared further without approval.

Fresh Meal Commerce

FlexPro Meals was positioned as a modern meal prep platform where food discovery, plan selection, and checkout need to feel simple from the first interaction.

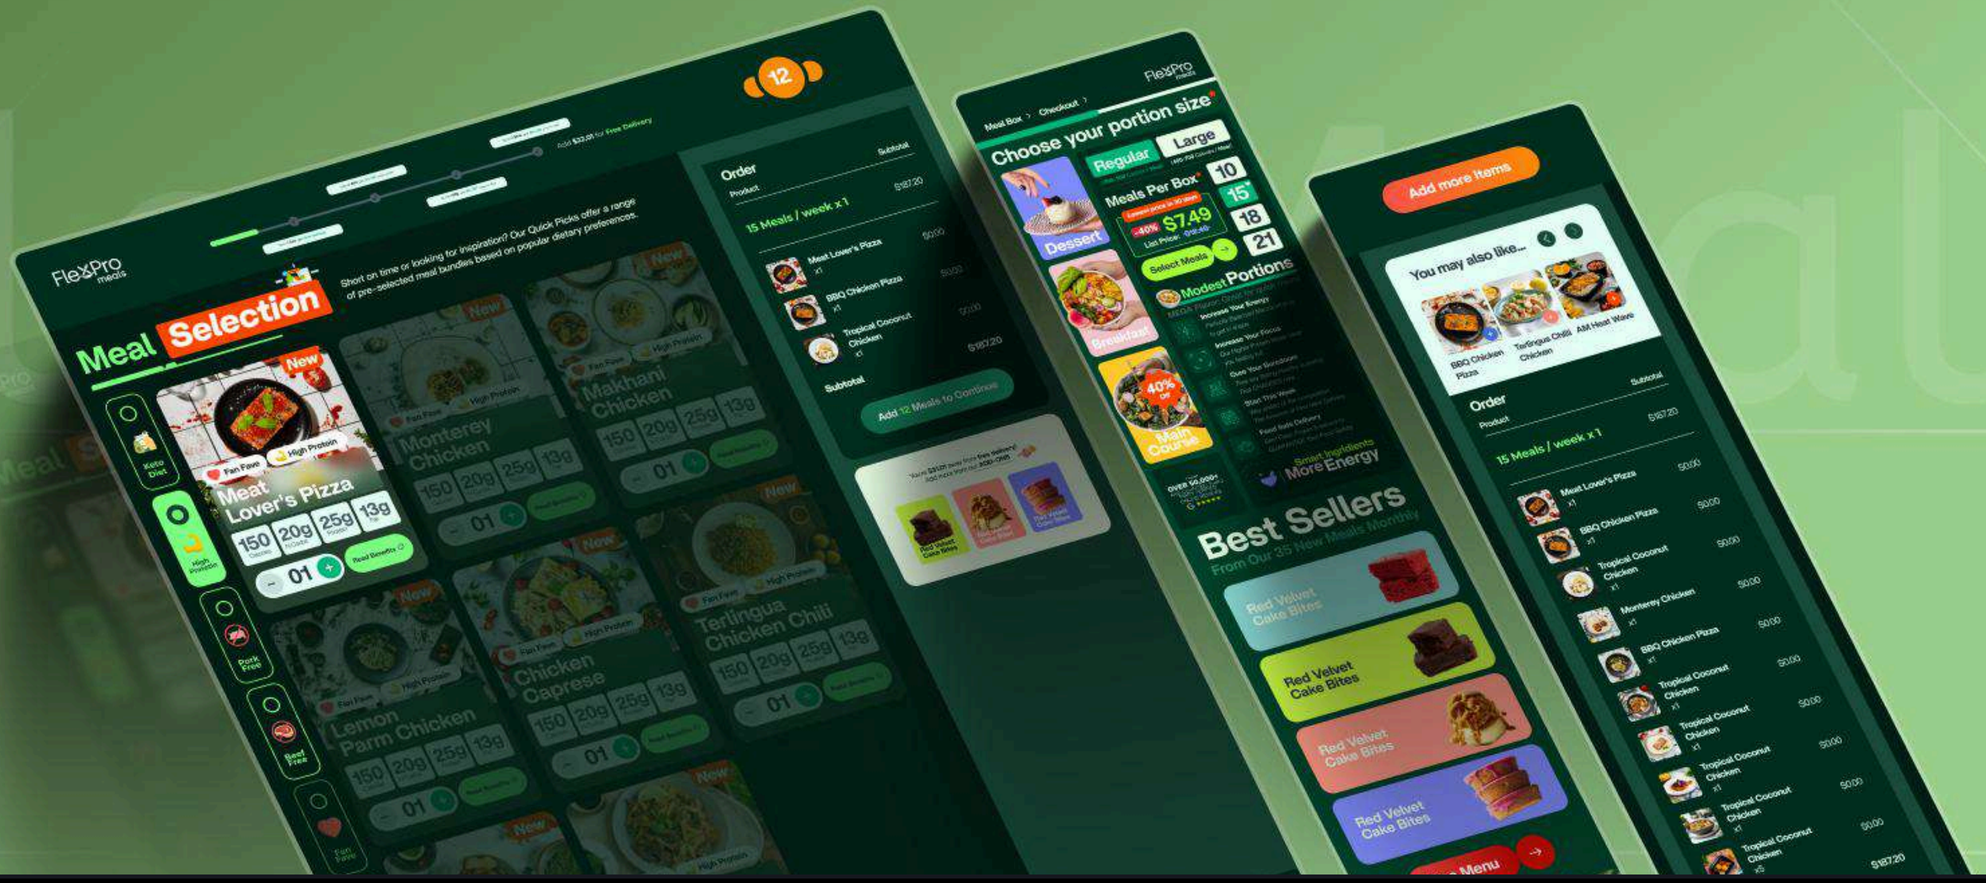

The final direction connects meal categories, best-selling dishes, portion sizing, subscription options, promotional discounts, cart actions, and checkout steps into one smooth ecommerce journey. The bright green palette, bold food photography, and card-based layout help make the product feel fresh, energetic, and easy to trust.

MEAL DISCOVERY FLOW

Categories, best sellers, meal cards, and product imagery were structured to make browsing fast and visually appealing.

CONVERSION-FOCUSED COMMERCE

Discounts, promotions, checkout actions, and repeat-order messaging were used to support stronger ecommerce conversion.

PROJECT NAME: YDPAY //

Crypto Exchange Experience

FINTECH, CRYPTO EXCHANGE & DIGITAL PAYMENTS / NOV 2025 — JAN 2026

YDPay is a digital finance platform built around buying, selling, sending, receiving, and trading crypto through one secure product experience.

The platform connects crypto exchange, custodial wallet security, fiat top-ups, card programs, bank transfers, and onboarding into a more accessible finance flow.
I shaped the experience to make crypto payments and exchange feel simpler, safer, and easier to understand for everyday users.

The goal was to reduce friction around wallet setup, trading actions, fiat funding, and account verification while keeping the product credible.

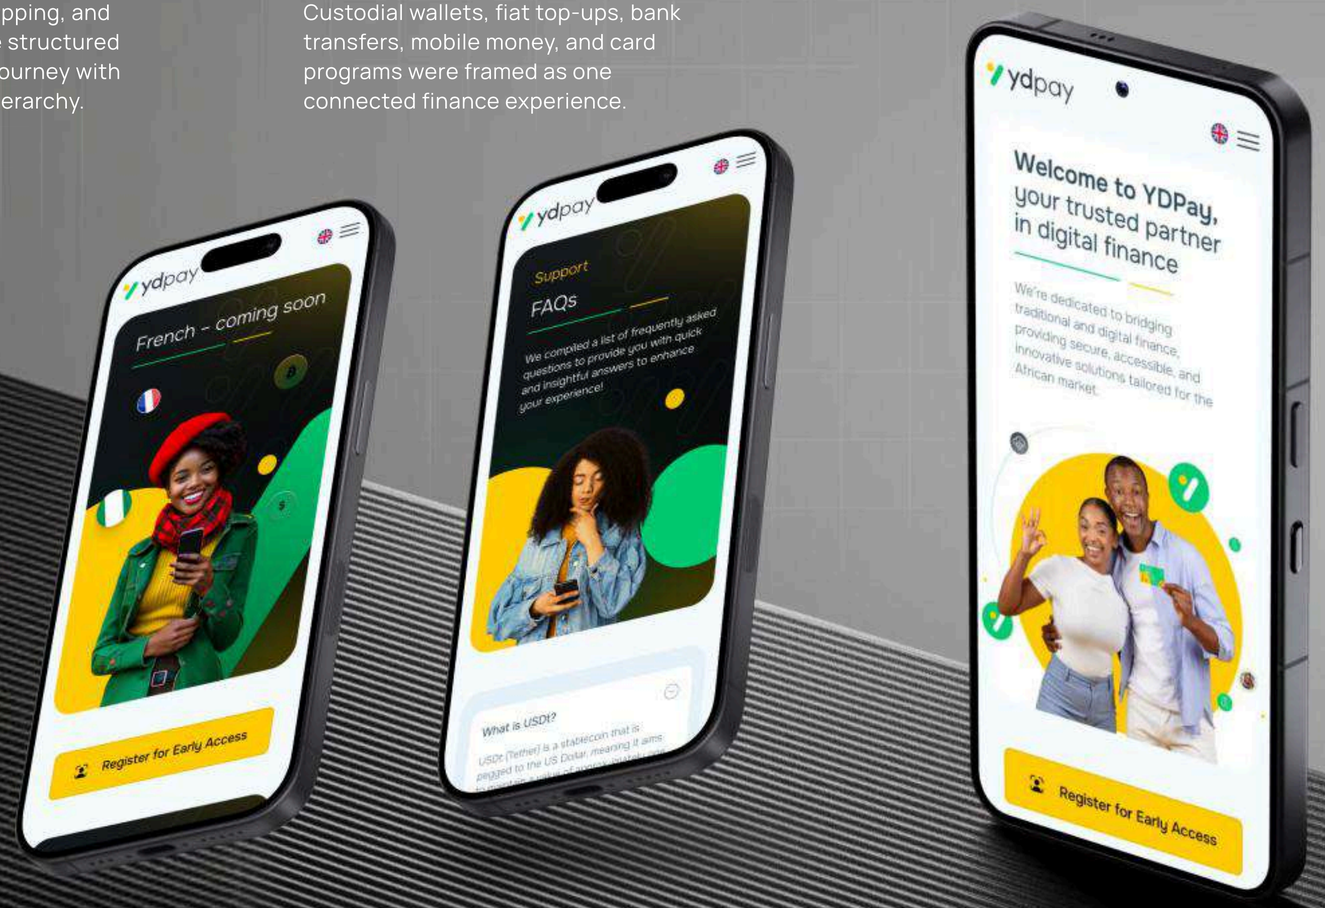

Copyright © Milan Peulic 2026 - This file is confidential and is not to be shared further without approval.

CRYPTO EXCHANGE FLOW

Buying, selling, swapping, and trading crypto were structured into a clearer user journey with stronger product hierarchy.

WALLET & PAYMENT SYSTEM

Custodial wallets, fiat top-ups, bank transfers, mobile money, and card programs were framed as one connected finance experience.

THE RESULTS

Investor–Ready Exchange UX

YDPay was positioned as a crypto finance platform where exchange, wallet, payments, and onboarding work together inside one trusted ecosystem.

The final direction connects crypto trading, fiat top-ups, custodial wallet security, account verification, supported payment methods, partner credibility, and early access conversion into one clear product story. The clean white interface, green/yellow accents, and payment-card visuals help make the platform feel modern, approachable, and credible for everyday crypto users.

Copyright © Milan Peulic 2026 - This file is confidential and is not to be shared further without approval.

Good visuals attract attention.

Smart systems convert it.
The goal is not only to look premium, but to create an experience that performs under real user behavior.

Digital Innovation Investment Platform

#VENTURE STUDIO EXPERIENCE

Momentas is a digital innovation and venture platform focused on building, funding, and accelerating future-facing technology companies. The brand sits between investment, strategy, product development, and startup growth, so the experience needed to feel premium, credible, and forward-looking.

I shaped the website to make Momentas feel more institutional and serious, not like another noisy startup or crypto-style landing page. The goal was to communicate innovation, partnerships, and digital investment through a cleaner and more elevated brand experience.

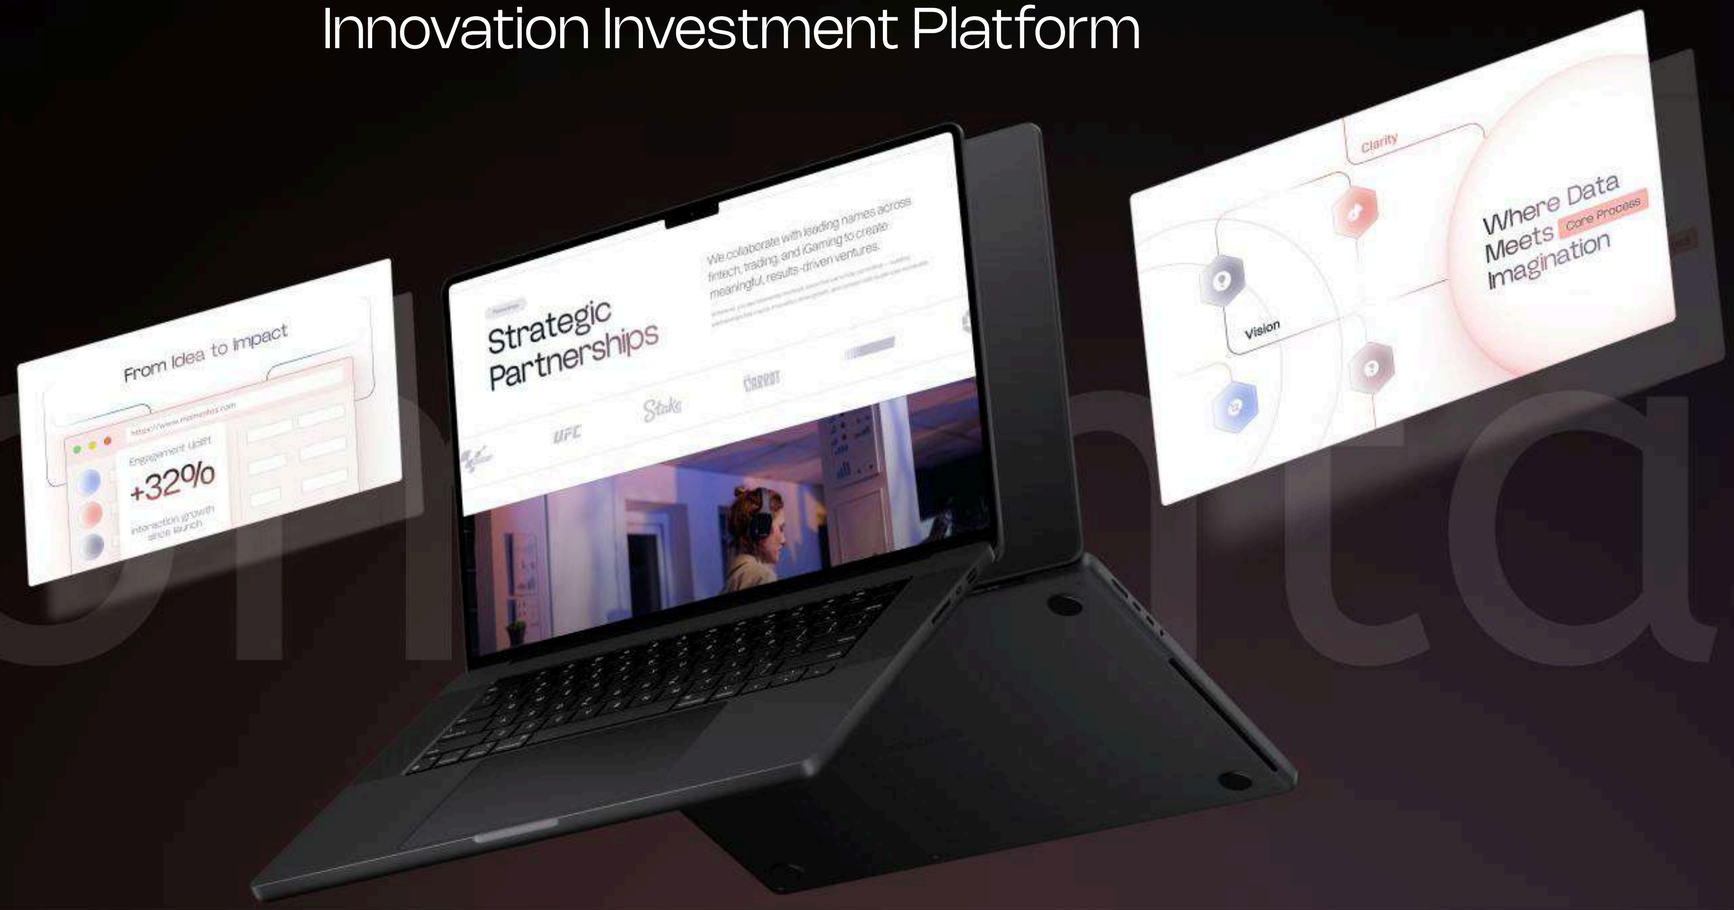

The design included landing page structure, high-fidelity UI, visual direction, content hierarchy, partner credibility sections, investment messaging, startup growth storytelling, and a refined presentation system built around soft gradients, clean typography, and glass-like interface elements.

A unified approach to product strategy, design, and engineering - built in partnership, delivered with precision.

Copyright © Milan Peulic 2026 - This file is confidential and is not to be shared further without approval.

Innovation Investment Platform

VENTURE POSITIONING

The website was structured to communicate Momentas as a company building and investing in digital innovation.

PREMIUM VISUAL SYSTEM

Soft gradients, clean typography, glass-like UI elements, and cinematic layouts create a more elevated tech-investment feel.

MEASURABLE RESULTS

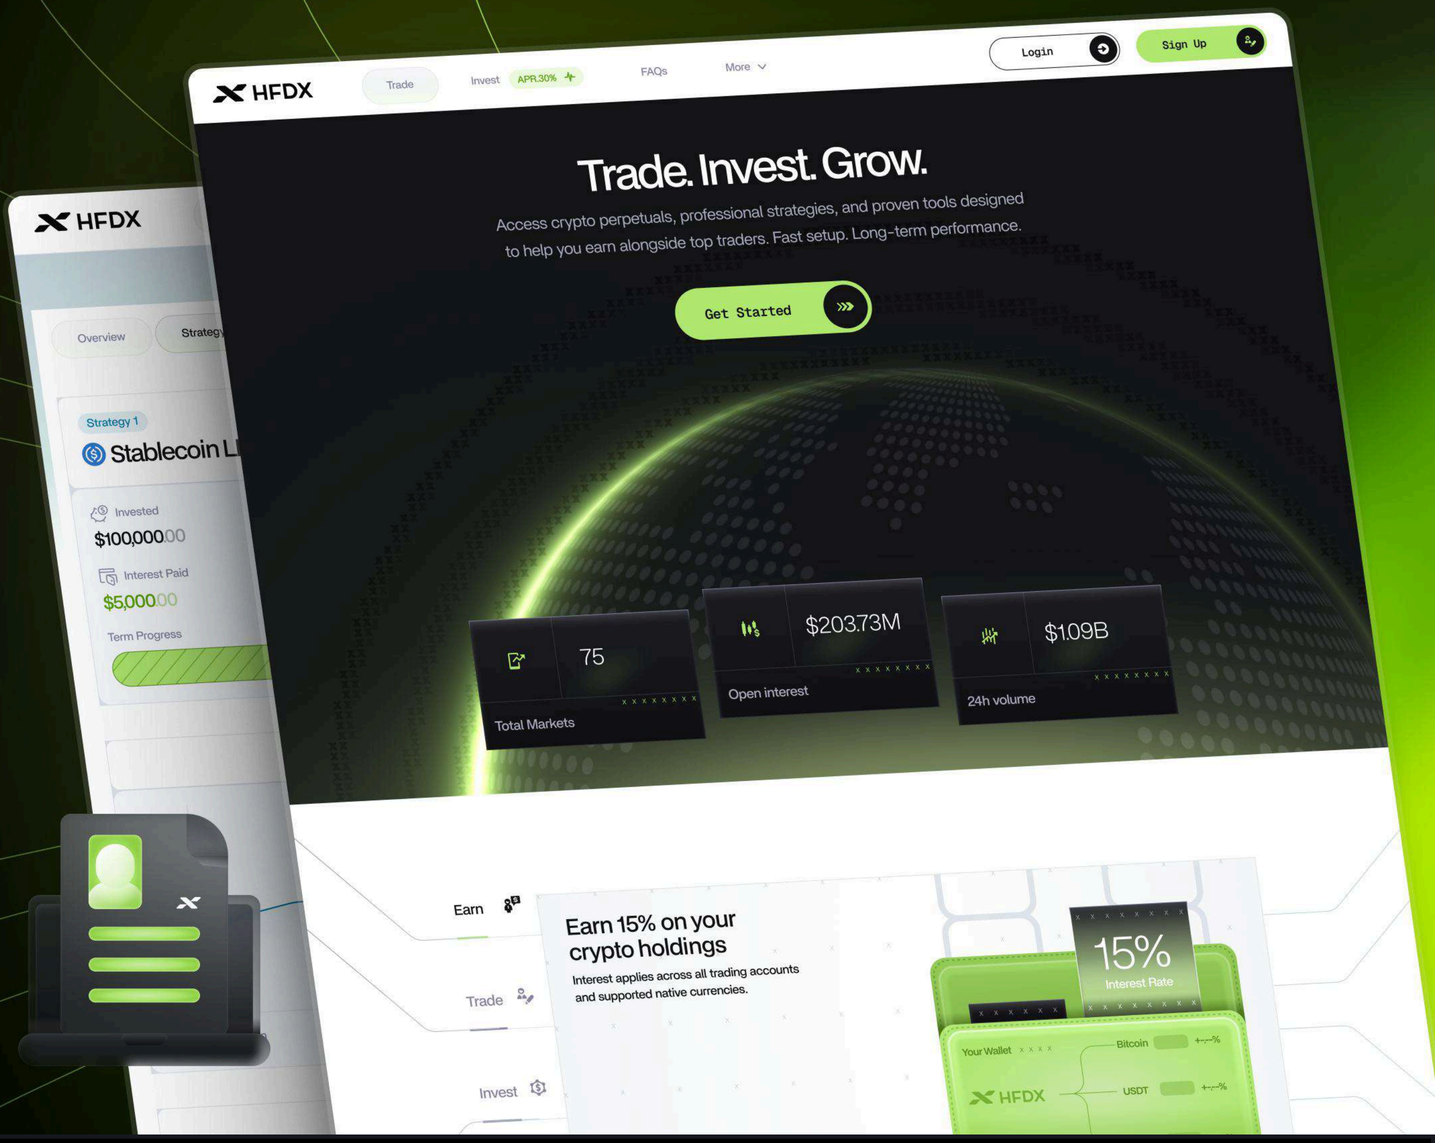

Momentas was positioned as a modern venture platform where technology, funding, partnerships, and digital growth needed to feel connected under one brand.

PROJECT NAME: HFDX //

High-Trust Trading Platform

FINTECH, DIGITAL TRADING & CRYPTO MARKETS /
NOV 2025 – JAN 2026

HFDX is a digital trading and investment platform built for automated execution, real-time performance insights, and transparent risk visibility.

I redesigned both the public landing page and trading dashboard to make complex trading concepts easier to understand and trust.

The work covered UX architecture, high-fidelity UI, motion design, dark-mode interfaces, and a unified visual system across marketing and product. The result was a clearer, more credible platform experience built around performance, transparency, and user confidence.

Copyright © Milan Peulic 2026 - This file is confidential and is not to be shared further without approval.

Performance-Focused Trading UX

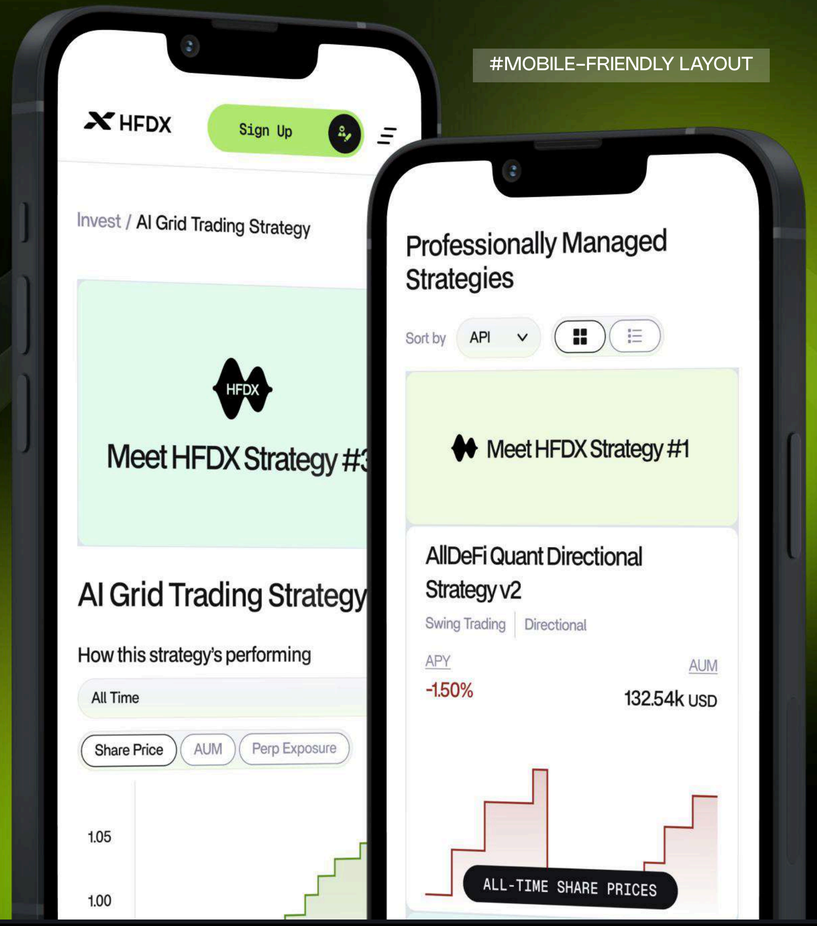

SIMPLIFIED TRADING UX

The interface turns advanced crypto strategy management into a cleaner, more visual flow focused on clarity, trust, and fast decision-making

BUILT FOR FAST DECISIONS

HFDX needed to turn dense trading information into a clear, touch-friendly experience.

The interface was structured to help users compare strategies, track performance, and move through key actions without friction.

THE RESULTS

Investor-Ready Trading UX

HFDX needed a product experience that could make automated trading feel clear, credible, and easy to trust.

The redesign focused on simplifying complex strategy data, improving dashboard readability, and creating a stronger first impression across both marketing and product screens.

I designed a mobile-first interface system with dark-mode trading visuals, sharper information hierarchy, and clearer user flows for account creation, strategy discovery, and portfolio tracking. The final result was a more polished, investor-ready platform experience built around performance, transparency, and confidence.

PROJECT NAME: PYLA //

Web3 Streaming Platform

ENTERTAINMENT, WEB3 & STREAMING
/ 2025

Pyla is a Web3 streaming platform built around movie discovery, multi-device access, token utility, partnerships, and community-driven growth. The product brings entertainment and digital ownership into one cinematic platform experience.

I shaped the website to feel more premium, immersive, and product-led — closer to a next-generation streaming brand than a typical Web3 presale page.

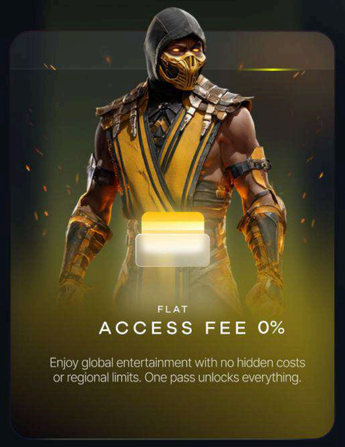

The design included landing page structure, high-fidelity UI, cinematic dark-mode visuals, streaming interface sections, tokenomics, roadmap, partnerships, giveaway areas, and responsive product storytelling across devices.

Copyright © Milan Peulic 2026 - This file is confidential and is not to be shared further without approval.

Streaming Meets Web3

#ENTERTAINMENT PLATFORM EXPERIENCE

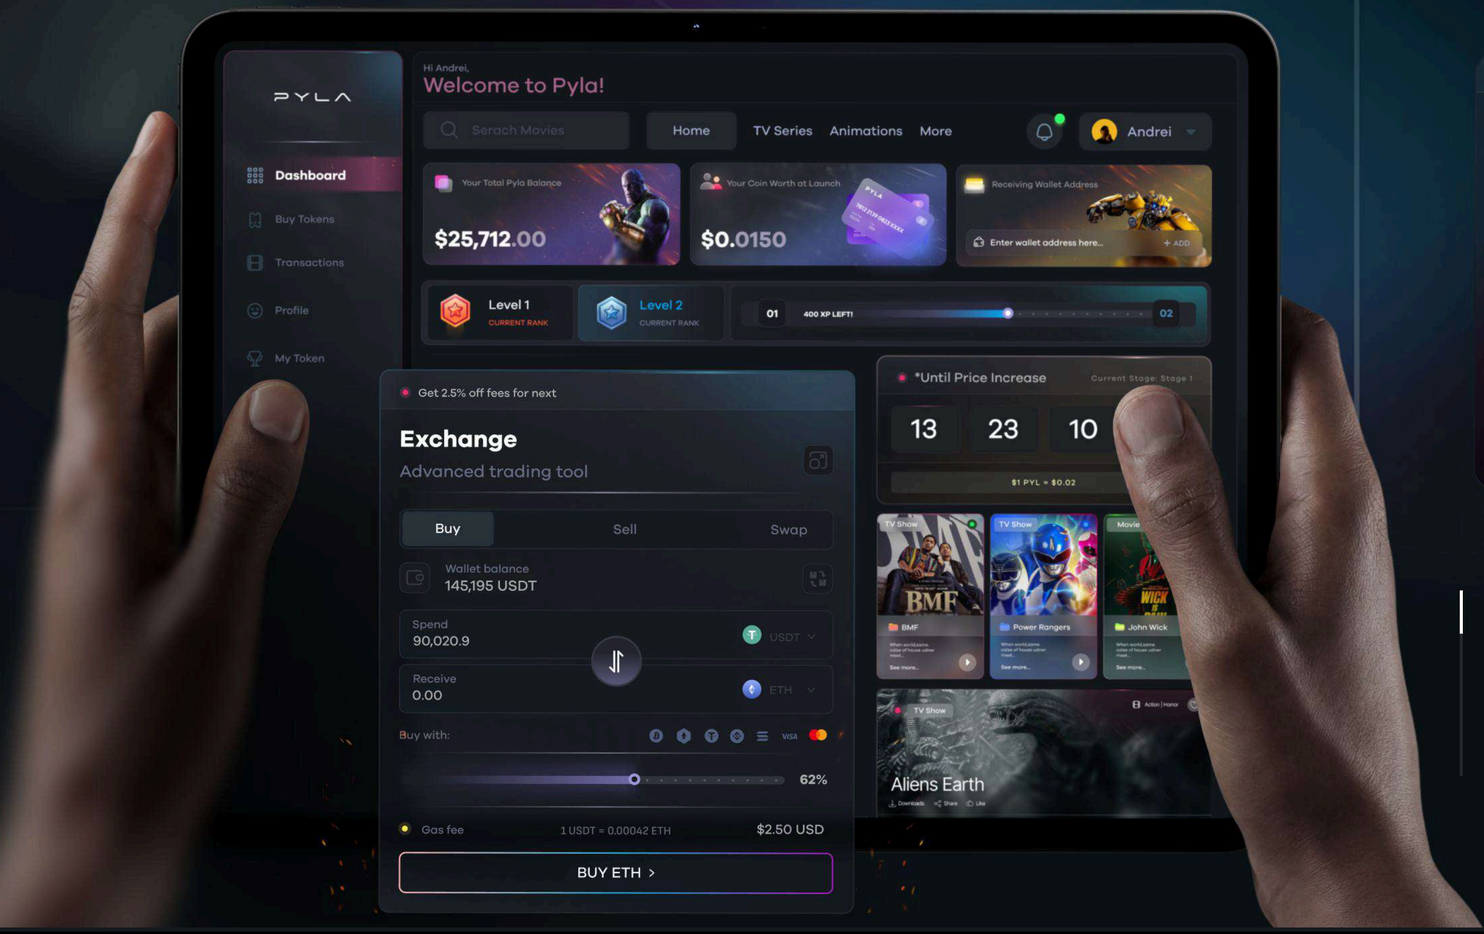

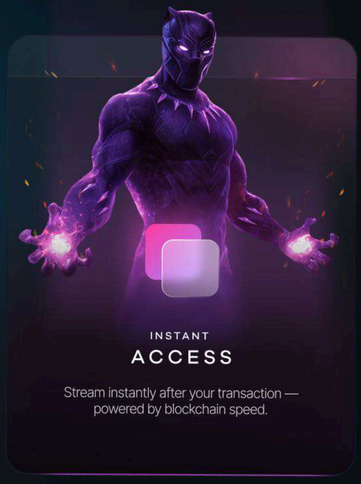

FLAT

ACCESS FEE 0%

Enjoy global entertainment with no hidden costs or regional limits. One pass unlocks everything.

Pyla was positioned as a streaming platform with a Web3 layer, not just a token project using entertainment visuals.

INSTANT

ACCESS

Stream instantly after your transaction — powered by blockchain speed.

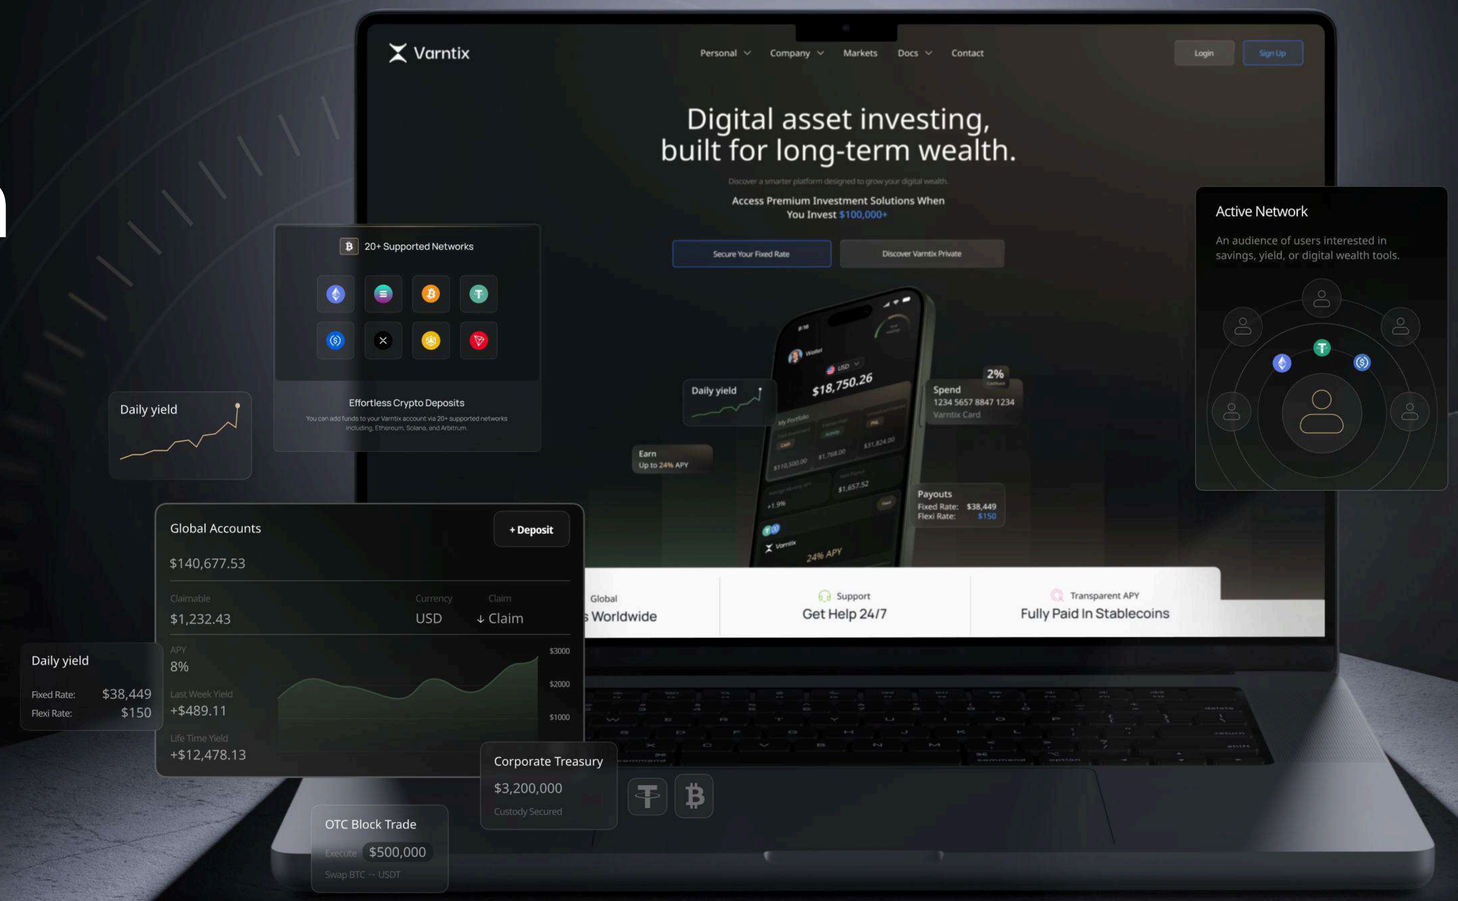

The product story highlights streaming across phones, tablets, desktops, and TVs with a consistent viewing experience.

PROJECT NAME: VARNTIX //

Digital Asset Wealth Platform

FINTECH, DIGITAL ASSETS & CRYPTO YIELD 2026

Varntix is a digital asset investing platform built around fixed yield opportunities, flexible savings, stablecoin payouts, treasury tools, and card-based spending. The product focuses on helping users earn predictable income from digital assets while keeping the experience structured, clear, and investment-led.

I shaped the platform story around long-term digital wealth instead of short-term crypto hype — making APY products, payout logic, account value, and earning opportunities easier to understand.

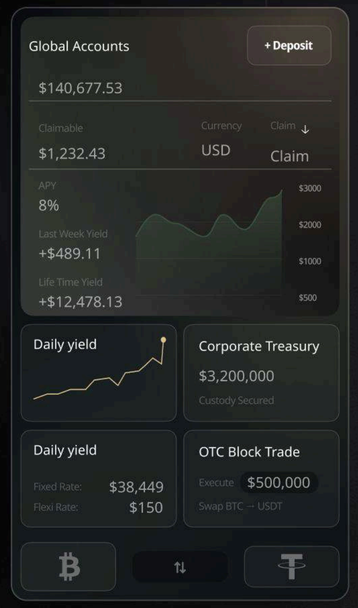

The design work included landing page structure, high-fidelity UI, product storytelling, dashboard-facing visuals, yield product sections, rewards messaging, and a cleaner visual system for a more mature crypto-finance brand.

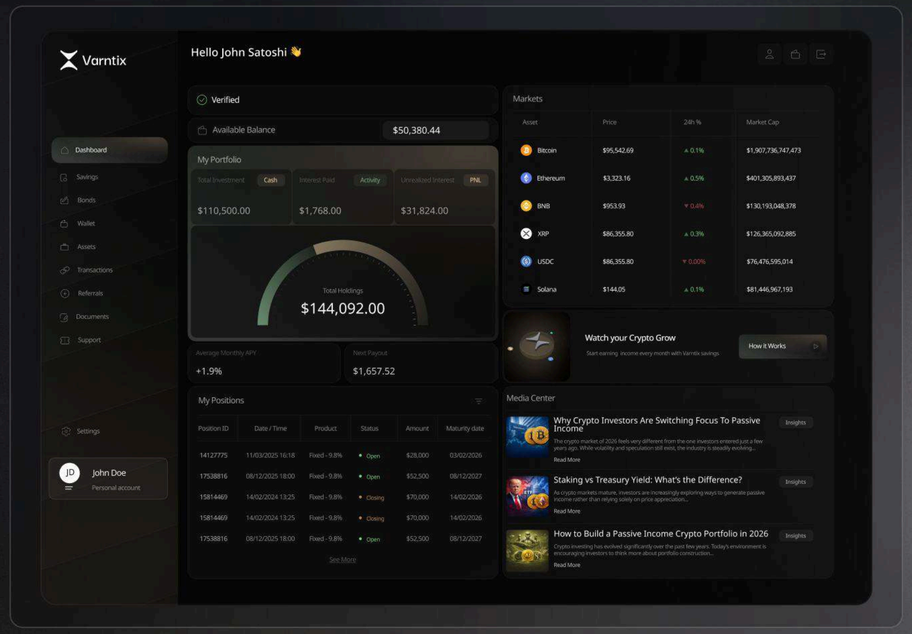

I created a digital wealth experience that makes crypto savings, yield products, and account rewards feel more structured and credible.

A unified approach to product strategy, design, and engineering - built in partnership, delivered with precision.

Copyright © Milan Peulic 2026 - This file is confidential and is not to be shared further without approval.

Structured Digital Wealth

Varntix was positioned as a digital wealth platform, not just another crypto savings page. The experience needed to explain how users can earn from digital assets while still feeling controlled, transparent, and investment-grade.

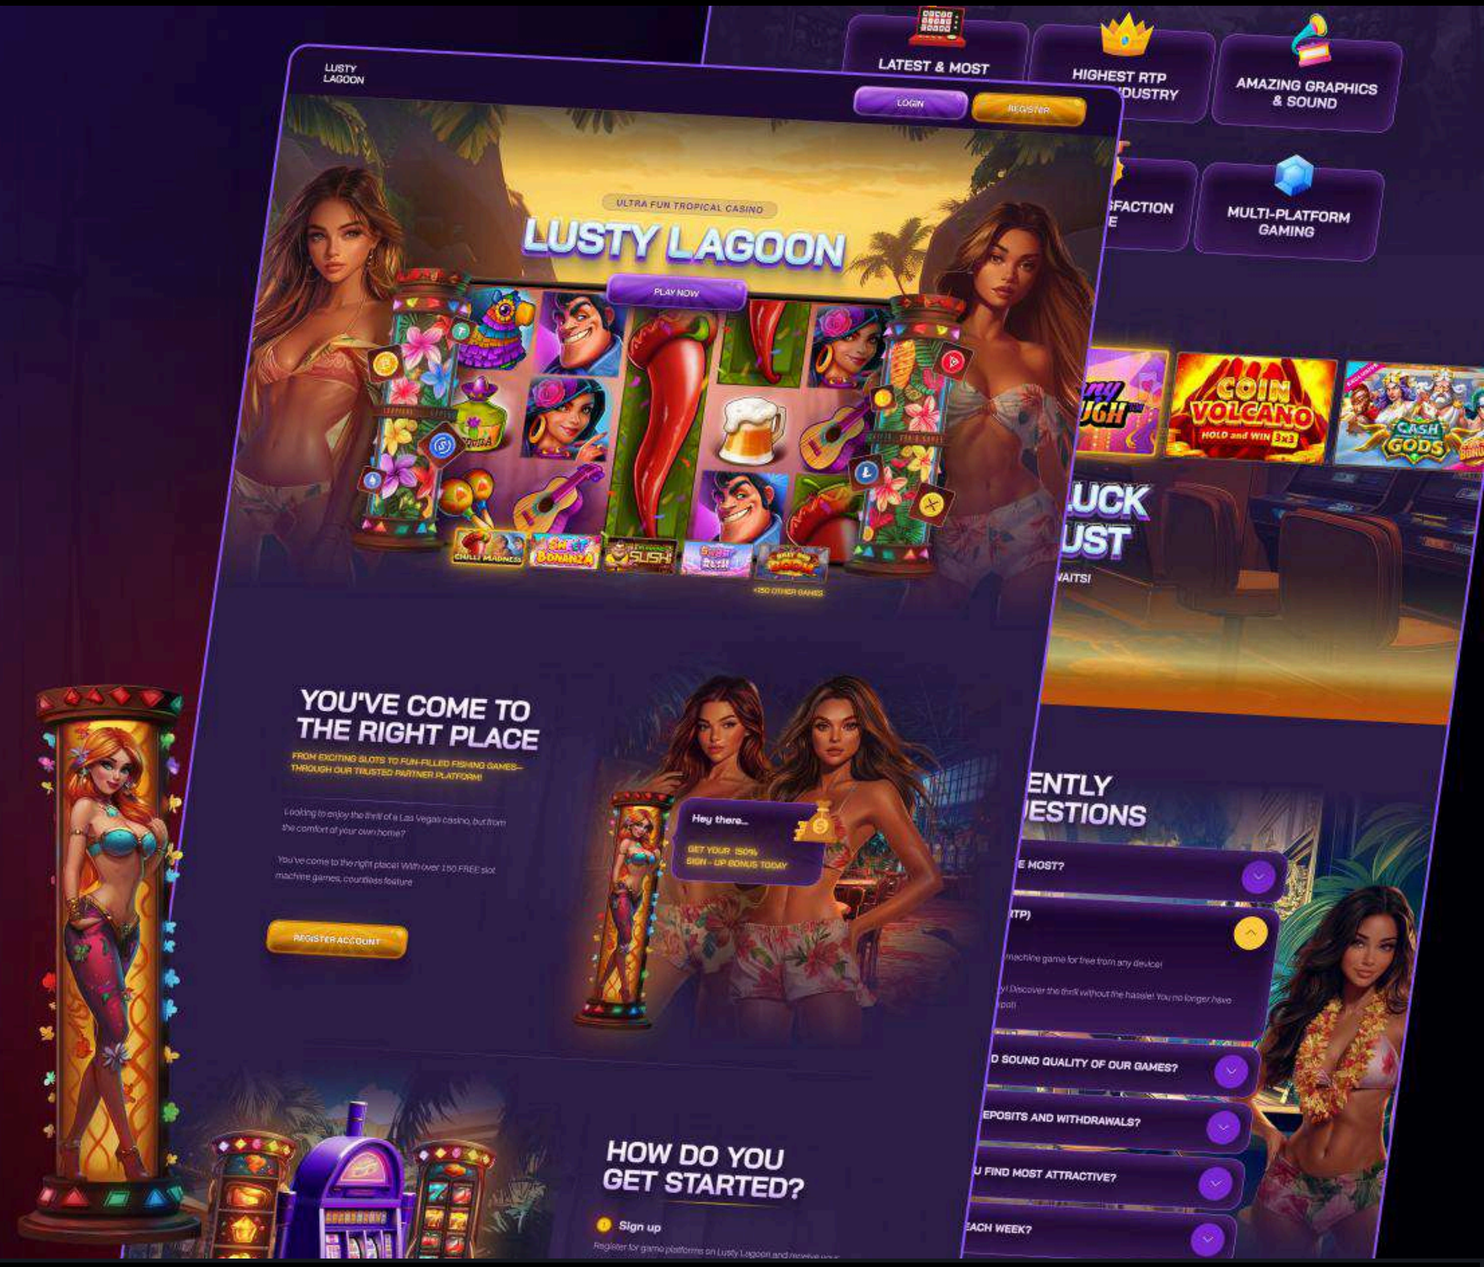

Copyright © Milan Peulic 2026 - This file is confidential and is not to be shared further without approval.

PROJECT NAME: LUSTY LAGOON //

Tropical iGaming World

IGAMING, CASINO / 2025

Lusty Lagoon is an iGaming product built around a tropical casino world, slot-style visuals, bold character art, and promotional gameplay offers. The product focuses on giving new players a fast, entertaining, and visually memorable entry into the casino experience.

CASINO LANDING PAGE

A high-energy iGaming page structured to introduce the brand, explain the offer, and push users toward registration.

TROPICAL GAME WORLD

The design uses island-inspired visuals, slot-machine assets, and character-driven scenes to create a memorable casino atmosphere.

Copyright © Milan Peulic 2026 - This file is confidential and is not to be shared further without approval.

Playful iGaming World

The design included landing page structure, high-fidelity UI, promotional offer sections, partner platform blocks, game preview areas, FAQ content, CTA placement, and a dark tropical visual system with neon accents and glossy casino assets.

THE RESULTS

Lusty Lagoon was positioned as an entertainment-first casino brand where the visual world needed to create instant attention before explaining the product.

The final direction connects tropical scenery, character-driven visuals, slot-machine energy, platform benefits, promotional offers, and registration CTAs into one clear landing page experience. The deep purple palette, neon highlights, glossy game cards, and tropical casino styling help make the brand feel more immersive, memorable, and built for quick player action.

PROJECT NAME: MODO CASINO US//

America's Hottest Social Casino!

IGAMING, SOCIAL CASINO / 2026

Modo is a mobile-first social casino platform built around casino games, arcade play, rewards, loyalty ranks, and collectible Modo Boxes. The product focuses on giving users a fast, colorful, and reward-heavy gaming experience where every screen pushes toward play, progress, or prize discovery.

MOBILE CASINO EXPERIENCE

A polished mobile gaming interface built around fast discovery, clear navigation, and high-energy casino visuals.

REWARD-DRIVEN UX

Daily bonuses, ranks, referrals, notifications, and limited-time offers were used to create stronger retention loops.

Copyright © Milan Peulic 2026 - This file is confidential and is not to be shared further without approval.

PRODUCT ECOSYSTEM

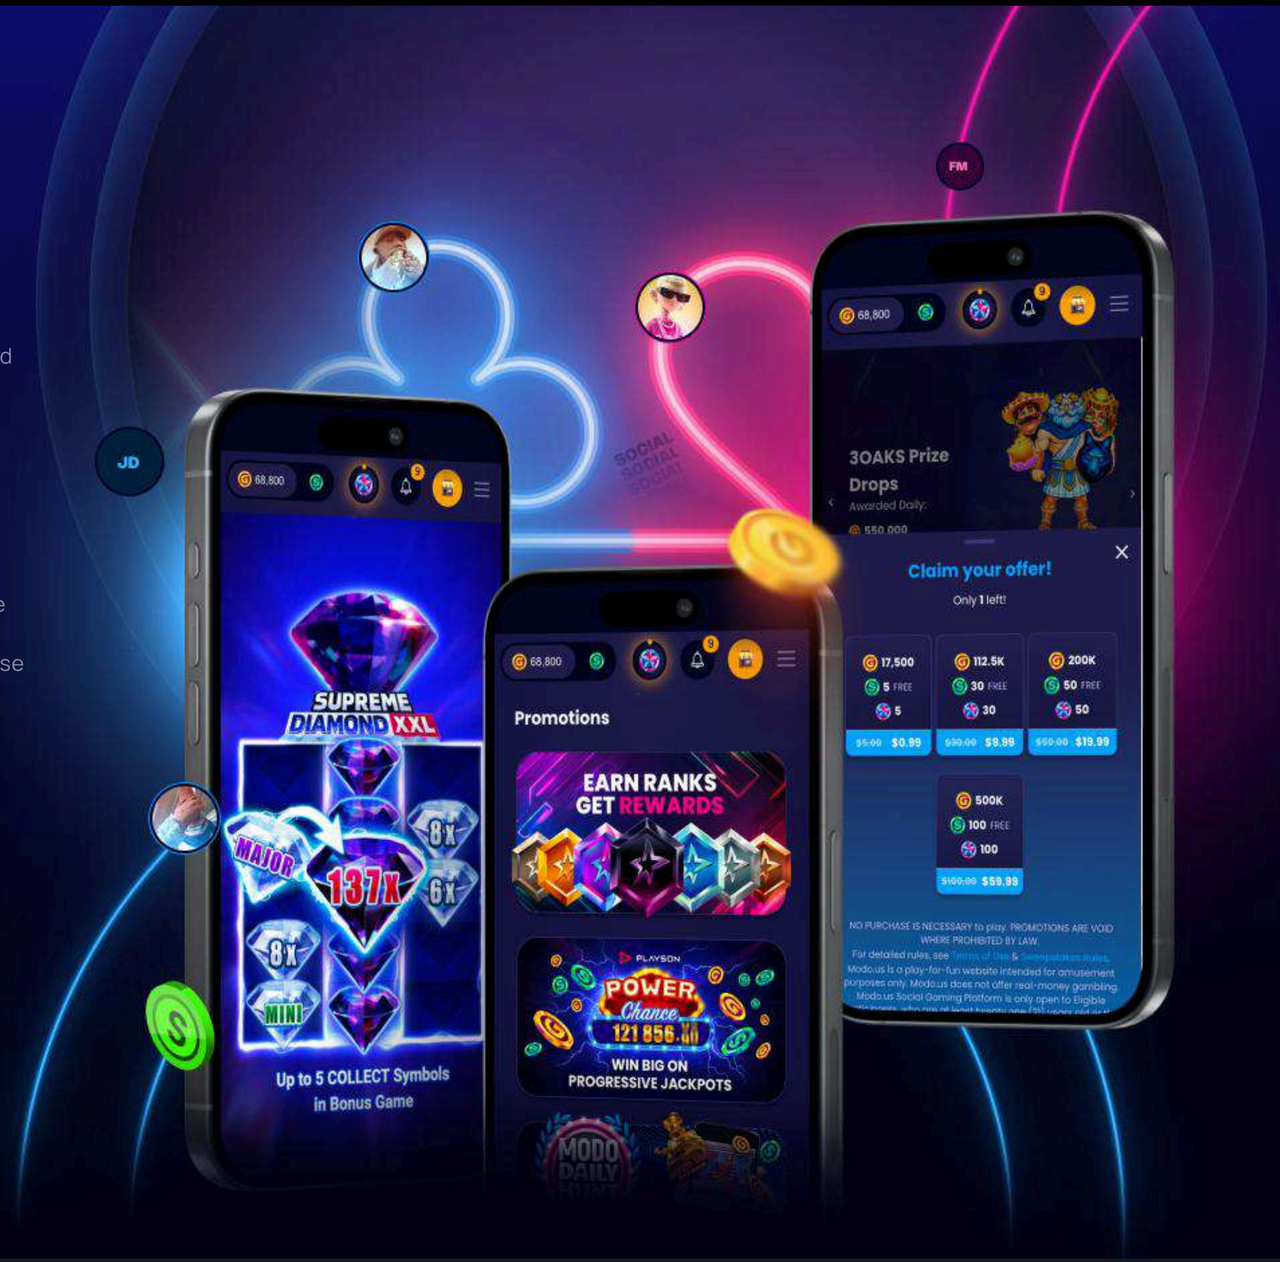

Casino, Arcade, Store, promotions, ranks, and boxes were structured as connected product areas instead of isolated screens.

OFFER ARCHITECTURE

Bundles, discounts, limited-time deals, and welcome offers were designed to create clear purchase moments throughout the app.

COLLECTIBLE MECHANICS

Modo Boxes introduce a reveal-based system where tickets, items, rarity, and redemption create a stronger sense of progression.

Beyond the Game Lobby

Modo Casino was designed as more than a standard game catalog. The product experience connects play, purchases, rewards, and collectible reveals into one continuous loop.

MEASURABLE IMPACT

The final direction connects casino games, arcade play, promotional bundles, daily bonuses, rank progression, referrals, notifications, desktop lobby views, and Modo Boxes into one unified product ecosystem.

The dark navy and purple interface, neon pink and blue accents, glossy cards, and modal-heavy offer system help make the product feel energetic, premium, and built for repeat interaction.
